

Razer Blackwidow Ultimate 2013 Key Replacement

This guide will demonstrate how to remove the keys and add the enhancement kit to silence the keys when typing.

Written By: Jacob Scoles

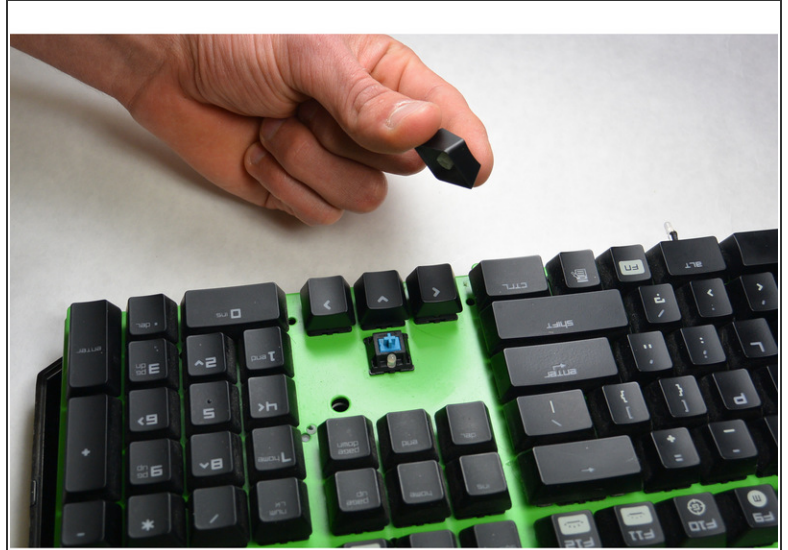

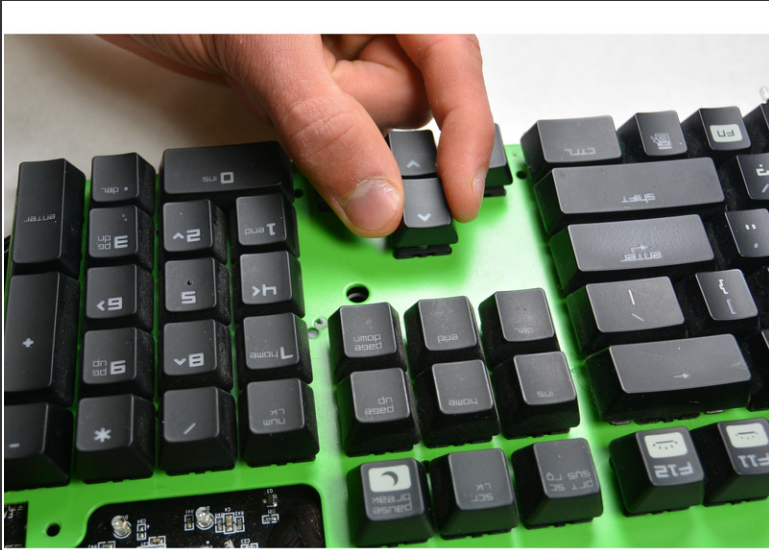

TOOLS:

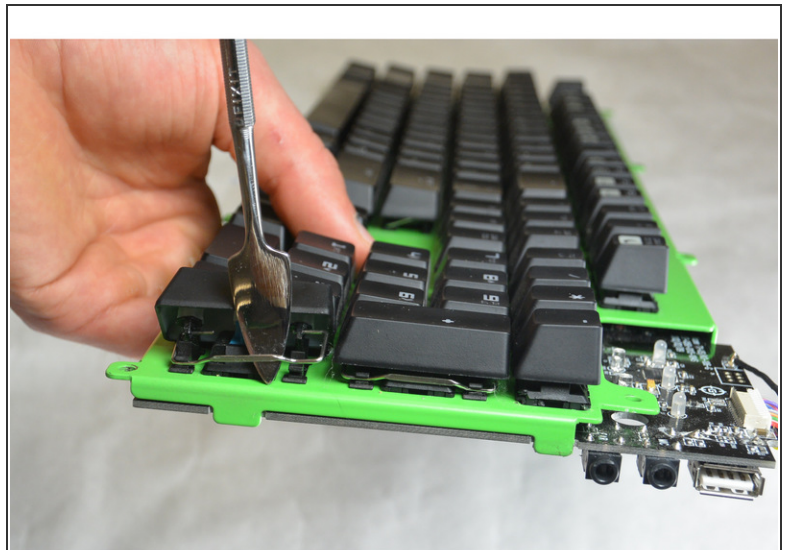

- [Metal Spudger](#) (1)
-

Step 1 — Key

- The regular sized keys are pretty easy to take off. You will only need your fingers to remove them. Though the keyboard case is removed in this part it is not necessary.

Step 2

- For larger keys such as the space bar, shift keys, + key, and enter, you will need special steps to remove these. This means that this axle located beneath the key will need to be released. Simply pulling it out and away from the center of the keyboard will release this. Be gentle as it easy to break.

Step 3

- The enhancement kit comes with rubber rings that simply slide onto the bottom of the key as shown. All keys have this cross on the center of their backs.

To reassemble your device, follow these instructions in reverse order.
